EDUCATION

B.Tech – Information Technology
Loyola ICAM College of Engineering
& Technology, Nungambakkam
3rd Year | Graduating: 2028

TECHNICAL SKILLS

- Languages**
- C, C++, Python, Java, SQL
- Web Technologies**
- HTML, CSS, JavaScript
 - React, Angular (Basics)
- Databases**
- MySQL, MongoDB
- Tools & Platforms**
- Git & GitHub, VS Code
 - Figma, Canva, Blender
 - MS Excel, MS Word

LANGUAGES

- English — Fluent
- Tamil — Native
- French, Hindi — Basics

TRAINING

- Plant Training**
Woory Automotives Pvt. Ltd.
Duration: 5 Days | Certified
- Internship**
Parkin Today Pvt. Ltd.
Frontend Developer | Duration: 8 weeks

SOFT SKILLS

- Leadership & Teamwork
- Problem Solving
- Technical Communication
- Research & Presentation

PROFILE

Third-year B.Tech Information Technology student with a strong foundation in full-stack web development, AI/ML, and blockchain technologies. Demonstrated leadership through multiple competition wins and academic project presentations at national and institutional forums. Eager to apply technical expertise through internships and contribute to impactful, real-world engineering solutions.

PROJECTS

FemTech Safety Web App
Developed a real-time emergency safety platform that captures the user's live GPS location and front-camera feed, transmitting them instantly to a dedicated Admin/Police Dashboard. Designed to enable rapid incident response and enhance personal safety for women in distress situations.

Web3 Todo Dashboard (DApp) – Ethereum
Built a fully decentralised task management application on the Ethereum blockchain using Solidity smart contracts, allowing users to add and manage tasks stored immutably on-chain. Integrated MetaMask wallet authentication and developed the frontend with JavaScript, Web3.js, and TailwindCSS for seamless real-time blockchain interaction.

Lost & Found Web Application
Designed and developed a full-stack Lost & Found platform using React, Node.js, Express, and MongoDB, featuring secure JWT authentication and Cloudinary-based image uploads. Users can register, post, and track lost or found items with location data, images, and item status in an intuitive card-based interface.

Smart Campus Service Portal
Built a comprehensive campus management system enabling students to submit complaints, book labs, and raise leave/OD requests through a unified portal. Implemented JWT-secured authentication, MongoDB Atlas storage, and an admin dashboard providing real-time tracking and status management of all incoming requests.

Healthcare Assistance Chatbot
Created an AI-powered healthcare assistant using Python and Random Forest machine learning to analyse user-reported symptoms and predict likely diseases with confidence scores. Integrated Ollama LLM for natural conversational interaction, with the system optimised for efficient local deployment without cloud dependency.

COMPETITIONS & ACHIEVEMENTS

- › 1st Place — Codeathon, TechVenture
- › 1st Place — Code Conquest, TechVenture
- › 1st Place — Code Relay, TechNova
- › 3rd Prize — Anti-Human Trafficking Club Event
- › 3rd Place — FLAIR'2K25, Paper Presentation
- › Represented department at Uimage Tech Summit, Trade Centre, Chennai
- › Presented research paper on 'Blockchain in Education – Certificate Verification System' at ITEF (International Tamil Engineers Forum), Trade Centre, Chennai
